

FINAL RESOLUTION FOR THE 12TH EDITION OF THE SCIENCE BY WOMEN PROGRAM

Within the framework of the 12th Edition of the Science by Women Program, a total of **8 research fellowships were offered by 6 host research centers**, namely: Biomedical and Health Research Institute (IUIBS-ULPGC), Castilla-La Mancha Health Research Institute (IDISCAM), Institut Ciència de Materials de Barcelona (ICMAB), Oceanic Platform of the Canary Islands (PLOCAN), Institute of Neurosciences (IN), and Institute of Astrophysics of the Canary Islands (IAC).

A total of **89 applications were received** during the application period, making this edition a highly competitive selection process. Following the initial review of the applications, the Mujeres por África (MxA) team carried out a pre-selection process in accordance with the requirements and criteria established in the call.

The pre-selected applications were subsequently assessed by a **joint committee of experts from the respective host research centers**. Following this evaluation, each host center made the final selection of one candidate and established a reserve list comprising at least one or two shortlisted candidates, in accordance with the needs and outcome of the selection process for each fellowship.

This year, on an exceptional basis, **IDISCAM will offer two fellowships of six months each, and IAC will offer two fellowships of three months each** to the selected candidates.

Based on the results of this process, the final list of selected candidates, shortlisted candidates and non-selected candidates is set out below.

Selected candidates will receive an email from Mujeres por África with information regarding the next steps and the arrangements for their fellowship. **Shortlisted candidates** will only be contacted in the event that a selected candidate declines or is unable to take up the fellowship. *No individual explanations or assessments regarding the outcome of applications will be provided.*

Mujeres por África would like to express its sincere appreciation to all candidates who applied to the 12th Edition of the Science by Women Program for their interest, commitment and the high quality of their applications. We warmly encourage those who have not been selected on this occasion to apply again in future editions and wish them every success in their scientific careers.

We remain committed to creating opportunities for international scientific cooperation that foster the leadership, visibility and recognition of African women scientists and their talent, in collaboration with leading centers of scientific excellence.
